

June 25, 2009 ---DOCUMENT # 1

**SUMMARY
Values and Principles
Secure Recovery Residence**

- Self-direction (self-determination, personal choice)
- Individualized and Person-Centered (honor and respect individual's experience of survival, resilience and growth)
- Empowerment (parity of decision-making, resources for consumer voice and leadership)
- Holistic (seeing people as whole persons beyond their label)
- Non-Linear (meeting people where they are in treatment, flexibility in service provision, relapse is a normal occurrence in the process of recovery)
- Strengths-Based
- Peer Support
- Respect
- Responsibility (meaningful roles in society)
- Hope (re-education of all on potential for recovery, people can and do full recover)
- Wellness and Health Promotion
- Fundamental Rights and Needs (away from coercion)
- Diversity (culturally competent)
- Eliminating Stigma and Discrimination
- Integration and Cohesiveness of Treatment – within facility and larger community (community connectedness)
- Accessibility of Information and Services

- Effective Treatment with Measurable and Observable Outcomes (evidence based)
- Least Restrictive, Most Effective Interventions
- Change, Growth and Learning for Providers, System, and Individuals Served are Integral Expectations
- Recovery is a Learning Process
- Use of Involuntary Strategies are Indicators of Treatment Failure
- Involuntary Procedures are Traumatic to the Individual and the Community
- Individuals Receiving Services Will be Part of Documenting Their Recovery Process, Successes and Challenges
- Program Development and Oversight Will Have Consumer and Community Input
- Neutral, Objective and Supportive Language is Imperative
- Recovery Can Occur in the Presence of Symptoms of Mental Illness
- Safety is Possible and Expected for all Participants
